

Cycloides Inc., signs partnership agreement with Triassic Solutions to empower businesses with real-time information

Trivandrum, India, August 5, 2015 – Cycloides Inc., a Toronto, Canada based enterprise consulting and high-end total solutions provider, today announced that it has signed a partnership agreement with Triassic Solutions Pvt.Ltd a leading engineering and enterprise software provider based in Trivandrum, India.

As part of the agreement, Cycloides will work together with Triassic Solutions to drive enterprise mobility and related technologies and services offering all-inclusive, mobility, cloud and hardware, solutions with a particular emphasis on enabling the real-time enterprise. These combined strengths will deliver significant value-based expertise to package mobile based front-ends providing customers with a comprehensive end-to-end internet and in-premise connected solutions. Cycloides has been successfully delivering complete solutions focused on cloud based enterprise mobility solutions used by private and public institutions.

Triassic Solutions is a leading technology provider and Deloitte Technology India's fastest 50 and Asia Pacific's fastest 500 company for 2014 based in Trivandrum, India. The company specializes in geographically distributed enterprise systems with very large number of connected end-points. The major verticals served by the company are retail, telecom, energy management, finance, healthcare and manufacturing. It has been recognized as an end-to-end provider involving custom hardware and software research and development. Triassic is a preferred vendor to many North American enterprises.

"With the synergy of Cycloides, and our depth of enterprise consulting and design skills, and Triassic Solutions, and their internet connected hardware and software concept-to-product development knowledge and proven expertise, we will be able to provide very large cloud and internet ready enterprise solutions to our customers," said, AR Anil, president and chief executive officer of Cycloides Inc. "This partnership raises the technology power of both and helps our customers with a single vendor providing complete solutions reducing the number of contacts."

"We enhance Cycloides' breadth of technologies to aid in the more complex and cloud ready applications with internet connected data collection points that are being implemented as enterprises are looking for more real-time information from their businesses for better and quick actionable intelligence." said Mr.Sivakumar, CEO from Triassic Solutions. "Triassic provides end-to-end platforms that customers from different domains require to satisfy their needs without affecting their current operations and infrastructure, but makes them future ready in this new era of low cost high speed internet. We are excited to move forward with Canada's one of the fastest growing high-end total solution providers Cycloides."
